

NYASA LOHIYA

AI ENGINEER

GENERATIVE AI | AI AGENTS | RAG

PROFESSIONAL SUMMARY

Designing scalable AI systems that automate business workflows and transform complex processes into intelligent, production-ready solutions.

TECHNICAL SKILLS

- Generative AI
 - Azure OpenAI
 - LangChain
 - AutoGen
 - Prompt Engineering
 - RAG
 - GraphRAG
- Programming Languages
 - Python
 - SQL
 - Java
- Machine Learning
 - Scikit-learn
 - TensorFlow
 - Pandas
 - NumPy
- Backend
 - FastAPI
 - REST APIs
 - Django

EDUCATION

SKIPS UNIVERSITY

M.Sc. Information Technology (Data Science Specialization)
2024 – 2026

Umiya BCA College

BCA | 2021–2024
CGPA: 7.55/8.0

PROFESSIONAL EXPERIENCE

AI Engineer (Internship)

Adrta Technologies
February 2026 – July 2026

- Architected enterprise Generative AI applications using Azure OpenAI and LangGraph to automate document-centric workflows.
- Engineered an AI-powered document generation system capable of producing structured reports from dynamic user-defined templates.
- Implemented multi-agent orchestration workflows enabling autonomous task execution and contextual decision-making.
- Integrated LLMs with backend APIs and external tools to automate business processes and improve operational efficiency.

AI PROJECTS

- PersonalAI
 - Multi-persona AI assistant with document Q&A and semantic search.
 - Tech: FastAPI • React • Azure OpenAI
- UIVerse
 - Autonomous UI exploration platform with intelligent web crawling, state graph generation, and execution reporting.
 - Tech: FastAPI • Playwright • NetworkX • Chart.js • Vis.js
- FastAPI RAG Document QA System
 - Document Q&A platform using Retrieval-Augmented Generation (RAG) and semantic search.
 - Tech: FastAPI • Python • Sentence Transformers • PyPDF2 • Embeddings
